Full-Stack Development

Web Application Development

Mobile Application Development

Muhammad Saif

Full Stack Developer | Web & Mobile Apps | SaaS & Startup MVPs
Islamabad, Islāmābād, Pakistan

Summary

I'm a Full Stack Developer with 4 years of experience building web apps, mobile apps, and SaaS products from early-stage MVPs to production-ready platforms.

I enjoy turning ideas into scalable, user-focused solutions and working across the full development lifecycle: planning, architecture, development, deployment, and iteration. I've worked on everything from fast MVPs for startups to robust systems designed to grow with users and traffic.

My strength lies in bridging frontend and backend building clean, responsive interfaces while ensuring performance, security, and reliability behind the scenes. I care about writing maintainable code, shipping real value, and continuously improving both the product and the process.

I'm specialized in:

1. SaaS products & startup MVPs
2. Web & mobile application development
3. Clean architecture and scalable systems
4. Collaborating with founders, designers, and product teams

Always open to exciting projects, collaborations, and conversations around building great software.

Experience

Freelance

Wordpress Developer

January 2023 - Present (3 years 8 months)

I'm a passionate and detail-oriented WordPress Developer with over 3 years of experience creating custom, responsive, and user-friendly websites for businesses of all sizes. I specialize in building performance-optimized WordPress sites from simple landing pages to complex eCommerce and membership platforms.

What I do:

- Custom WordPress theme and plugin development
- Elementor, WPBakery, and Gutenberg-based design
- WooCommerce setup and customization
- Speed optimization and mobile responsiveness
- SEO-ready structure and on-page best practices
- Bug fixing, maintenance, and website migration

Whether you're a startup, agency, or established brand, I help bring your digital vision to life with clean code, scalable solutions, and pixel-perfect execution.

Let's connect and build something great together!

Freelance | Self-Employed

Freelance

January 2022 - Present (4 years 8 months)

Islāmābād, Pakistan

Developed and maintained full-stack web and mobile applications, contributing to the end-to-end delivery of SaaS products and startup MVPs. Worked across frontend and backend systems to build responsive user interfaces, scalable APIs, and efficient database structures. Implemented authentication, payment integrations, and third-party services while ensuring performance, security, and reliability. Collaborated closely with product managers, designers, and stakeholders to translate requirements into technical solutions, participated in code reviews and debugging, and supported deployments and ongoing product improvements.
